

Highlights

- In week 47 of 2017, the individual local flu activity indicator values were mixed compared to last week. A notable increase in positive lab results was seen. As a whole, flu intensity (composite indicator) was stable compared to last week and continues to be low.
- Geographic spread and local intensity designation (Click [here](#) for definitions) = LOCALIZED, LOW
- Local medical facility labs reported 1,046 tests run with 29 (2.8%) positive results for week 47 of 2017.
- The percentage of ED visits for influenza-like-illness (ILI) was stable and respiratory symptom visits increased slightly compared to last week. The percentage of ED visits for both ILI and respiratory symptoms were above their respective baseline averages for the week.
- In week 47 of 2017, trends for categories of local over-the-counter medication sales tracked were mixed (increase in pediatric anti-fever sales; decrease in cough and cold, thermometer, adult anti-fever, and throat lozenge sales; stable electrolyte and chest rub sales) compared to last week.
- Nationally influenza activity increased in week 47. Please [visit the CDC website for specific information](#) (National data is usually updated on Friday of each week).

Local Flu Activity Dashboard (All data are preliminary and may change as updated reports are received.)

Reportable Conditions (Cumulative Numbers as of Dec 1, 2017)	2012	2013	2014	2015	2016	2017 YTD

Influenza Associated Hospitalizations (IAH) Reported by Admission Year ⁶	394	301	875	448	292	614
IAH comparison by Season (October - May or Weeks 35 - 20)	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18
Current season (2017-18) is from week 35 through week 47.	512	486	872	264	625	9

¹Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.
²Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "●" = Stable (-2% to +2%).
³Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).
⁴Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Franklin County, OH athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.
⁵Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.
⁶Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.

Influenza Morbidity and Influenza-Like Illness (ILI) Reports

In week 47, the preliminary local influenza and influenza-like-illness (ILI) visit rate to athenaHealth® providers (0.3 per 1,000 visits) decreased compared to the previous week and is below its baseline average for the week (Figure 1). The week 47 percentage of all Emergency Department (ED) visits categorized as ILI was stable compared to the previous week (Figure 3) and is above its historic baseline for the week.

During week 47 of 2017, 2.3% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is above the national baseline of 2.2% for week 47.

Laboratory Surveillance

During week 47 of 2017, reporting Franklin County sentinel medical facility laboratories tested 1,046 specimens, with 29 (2.8%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2017 through week 47 of 2017 is 10,259 with 95 (0.93%) positives (59 type A, 34 type B, 1 type A and B, 1 type unknown).

Nationally in week 47 of 2017, clinical laboratories reported 14,626 specimens tested for influenza viruses, 1,051 (7.2%) of which were positive (795 type A, 256 type B). Public health laboratories reported testing 642 specimens, 210 of which were positive (186 type A – of which 18 were A(H1N1)pdm09, 168 were A/H3, and 0 were not subtyped; 24 type B – of which 20 were Yamagata lineage, 0 were Victoria lineage, and 4 where lineage was not performed). Please visit the CDC website for more information, including cumulative data.

In week 47, Ohio clinical labs reported 9,890 specimens tested for influenza this season thus far. Positive results include: (0) A(H1N1)pdm09; (4) A/H3N2; (84) Flu A Not Subtyped, and (31) Flu B (through 11/25/17). In week 47, ODH Public Health Lab reported 19 specimens tested for influenza from various submitters this season thus far. Positive results include: (1) A(H1N1)pdm09; (10) A/H3N2; (0) Influenza B (through 11/25/17). Please visit the ODH website for more information.

ED Respiratory Visits

In the 47th week of 2017, the percentage of all ED visits categorized as respiratory increased slightly compared to the percentage seen the previous week and is above its historic baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales

In week 47 of 2017, trends for categories of local over-the-counter medication sales tracked were mixed (increase in pediatric anti-fever sales; decrease in cough and cold, thermometer, adult anti-fever, and throat lozenge sales; stable electrolyte and chest rub sales) compared to last week.
